

Press Release October 2010

**CITY OF TROY
REAL PROPERTY REASSESSMENT PROJECT 2013
Data Collection Begins**

The first phase of the Reassessment Project will begin the week of October 11th with the start of the residential data collection/verification process. GAR data collectors will begin in the Lansingburgh area of the city. More specifically, GAR data collectors will be located in the area bound by the Hudson River (to the west), the Town of Schaghticoke (to the north), the Town of Brunswick (to the east), and 112th Street (to the south). Upon completion of this area, collectors will continue to move in a southern direction. A bi-weekly report on progress will be posted on the City of Troy Web Page at www.troyny.gov so that property owners are kept informed.

Since accurate data is critical to the overall success of this project, GAR staff will request an interior inspection when at your property. If the property owner is not home at the time of inspection, GAR staff will perform an exterior inspection including measurements and photographs.

ALL GAR STAFF WILL HAVE PROPER IDENTIFICATION ON THEM DURING FIELD INSPECTIONS. The City Assessment office, City Clerk's office and local police agencies will have a vehicle list of all project staff members.

The data collection process will continue through May 2012. If you have any questions or concerns, please call 1-866-910-1776.
